RETAIL ANALYTICS · PROJECT FRAME

Consumer shopping behavior is changing

Understand shifting purchasing patterns to improve sales, satisfaction, and long-term loyalty.

A DECISION-ORIENTED FOUNDATION FOR CUSTOMER, MARKETING, AND PRODUCT TEAMS

NAME : SWATI YALLURKAR

Made with GAMMA

The business question is where to focus

01 / SEE THE SIGNAL

Reveal trends

Use consumer shopping data to see how purchasing patterns are shifting.

02 / BUILD ENGAGEMENT

Strengthen connection

Make engagement and loyalty easier for stakeholders to explore.

03 / CHOOSE THE MOVE

START HERE

Optimize strategy

Connect evidence to marketing and product choices without assuming the answer in advance.

Made with GAMMA

Five forces may shape purchase decisions

THE ANALYTICAL LENS

Look across forces

These are questions to test in the data, not findings already established.

COMPARE BEHAVIOR ACROSS CUSTOMERS, CATEGORIES, AND CHANNELS.

Discounts and promotions

Product reviews

Seasonality

Payment preferences

Channel choice: online versus offline

Made with GAMMA

RETAIL ANALYTICS · FOUNDATION

Start with a trusted analytical foundation

Reliable decisions begin with consistent inputs.

01

Clean and transform

Prepare the raw consumer dataset so records are usable for analysis.

02

Standardize fields

Align names, formats, and definitions for consistent analysis.

03

START HERE

Prepare reusable inputs

Make trusted inputs available for downstream reporting and stakeholder use.

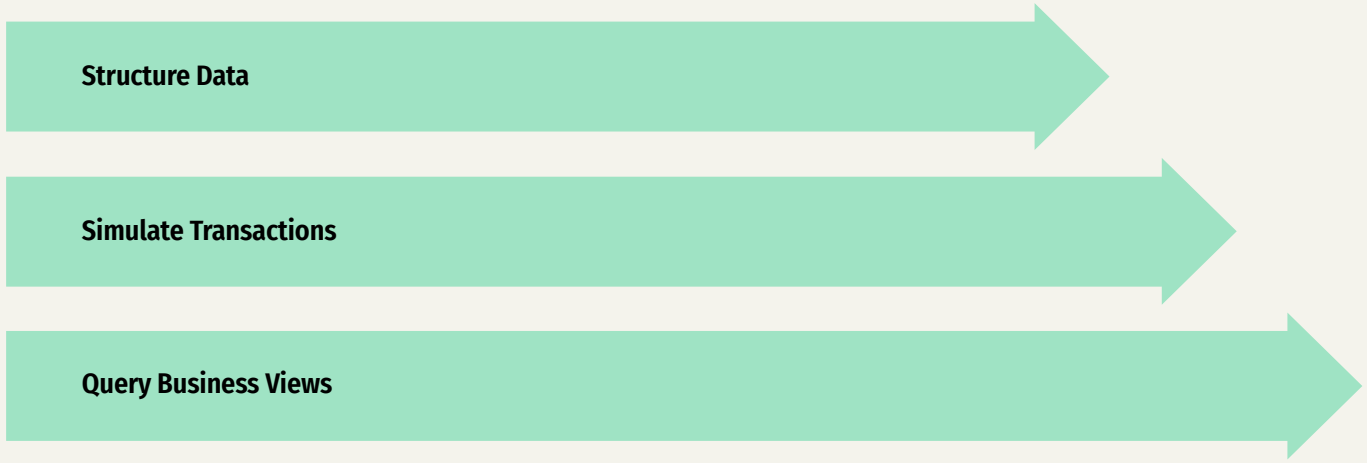

THE METHOD CREATES CONFIDENCE BEFORE THE FIRST BUSINESS VIEW IS BUILT.

Made with GAMMA

RETAIL ANALYTICS · SQL LAYER

Use SQL to turn records into business views

FROM RAW RECORDS TO QUESTIONS

BUSINESS VALUE

SQL makes the questions repeatable

- Structure data for analysis
- Simulate business transactions
- Query segments, loyalty, and purchase drivers

Made with GAMMA

Segment customers by behavior, not just demographics

THE COMPARISON

Find meaningful groups

Compare purchasing patterns across demographics, product categories, and sales channels.

THE GOAL IS A USEFUL BEHAVIORAL VIEW, NOT A DEMOGRAPHIC LABEL ALONE.

Made with GAMMA

RETAIL ANALYTICS · DASHBOARD

Make loyalty visible in the dashboard

Interactive Power BI views should help stakeholders explore the relationship between repeat purchasing, engagement, and channel behavior.

01 / REPEAT

Repeat purchasing

Make returning behavior visible for exploration.

02 / ENGAGEMENT

Engagement signals

Connect activity to customer behavior without overclaiming causality.

03 / CHANNEL

EXPLORE

Channel behavior

Let stakeholders compare online and offline paths interactively.

Made with GAMMA

RETAIL ANALYTICS · DECISION FRAMEWORK

Connect insights to marketing and product choices

01 / TARGET

Relevant offers

Target segments with offers that reflect their observed behavior.

02 / IMPROVE

Repeat purchase

Strengthen the experiences that encourage customers to return.

03 / SHAPE

DECISION LENS

Product strategy

Use category and channel patterns to guide product choices.

INSIGHTS EARN THEIR PLACE WHEN THEY CHANGE A CHOICE.

Made with GAMMA

RETAIL ANALYTICS · REUSABLE OUTPUTS

Package the work so it can be reused

01 / EXPLAIN

Project report

Findings and recommendations in a form that preserves the reasoning behind the work.

02 / ALIGN

Presentation

A concise narrative for stakeholder alignment and decision-making.

03 / REUSE

KEEP THE CHAIN

Structured repository

Python, SQL, and dashboard files organized so the analytical path can be revisited.

A REUSABLE PACKAGE MAKES THE NEXT QUESTION FASTER TO ANSWER.

Made with GAMMA

Move from analysis to action

START HERE

THE DECISION PATH

1. Validate the data
2. Surface the strongest drivers
3. Align on priority segments
4. Translate findings into measurable actions

Keep the method grounded, the choices visible, and the next action measurable.
